## **Mold Dog Does Free Mold Inspection At Stockton Borough School**

STOCKTON, NJ – The Borough School was inspected recently by Oreo, the Northeast’s first certified Mold Dog<sup>®</sup>, after Lab Results LLC offered the service free of charge to elementary schools in the tri-state area.

Chief School Administrator Suzanne Ivans was the first school official to respond to the offer from Lab Results, an indoor air-quality improvement company that specializes in mold detection and location.

“We got some very useful information,” said Ms. Ivans, “that would have been difficult, if not impossible, to get any other way. At the very least it would have been very time consuming.”

“I would encourage other schools and businesses to utilize this service, and be more proactive in maintaining a healthy indoor environment for the people entrusted to them, especially the children,” she said. “By finding potential problems early they might be able to minimize costs and prevent a small problem from growing into a large and costly operation.”

Founded in 1832, Stockton is the oldest and smallest school district in New Jersey. It has a single, solid stone schoolhouse built in 1875, tucked into the base of the hills surrounding this historic, riverside town. The school district has a long record of being highly proactive in protecting the health and safety of its students.

The Mold Dog<sup>®</sup> inspection is offered – free of any monetary charge or obligation – for a limited time and on a first-come, first-served basis, to schools in the K-6 range in New Jersey and the New York and Philadelphia metropolitan areas. Call 1-800-630-9047 for more information. Results of all inspections are confidential.

“Schools in which mold is found are under no obligation to use Lab Results LLC to assist in its removal,” said Jason Earle, founder of Lab Results. “This offer is our way of helping to protect the children in our communities from the health threats of mold.”

Mold Dogs<sup>®</sup> are the newest and most economical tool in the quest to protect people from the pervasive threat of mold in homes, schools and offices. Mold Dogs<sup>®</sup> can quickly find

hidden mold in any building, enabling the growth to be removed efficiently and economically

Mold, and the toxins it produces, can cause severe health problems, including asthma, allergies, sinusitis, headaches, chronic fatigue, memory loss and even brain damage. Some diseases caused by mold can even be fatal. In modern, airtight buildings, mold can find places to grow more easily than ever before.

“Oreo is delightful,” Ms. Ivans said, “and it was touching to see such a wonderful bond between Oreo and Jason.”

Oreo, a one-year-old Labrador mix, is Lab Results LLC’s four-legged mold detective. She is one of fewer than two dozen animals in the U.S. certified as Mold Dogs<sup>®</sup> by the Florida Canine Academy, which also trains canine teams for detection of bombs, drugs, money, weapons, termites and accelerants used in arson.

“Oreo is an intelligent mold inspector who can tell us precisely where mold hides, behind walls, under floors, in ceilings or wherever it lurks,” said Earle. “Knowing where mold hides – and where it doesn’t – can save thousands of dollars in remediation costs.”

Lab Results LLC is an indoor air-quality improvement company based in Princeton, NJ. The company specializes in the detection and location of mold and its causes in all indoor environments including residential, commercial and industrial spaces.
